

7x24

The 7x24 Exchange (Metro New York Chapter) is the leading knowledge exchange for those who design, build, use and maintain mission-critical enterprise information infrastructures. This organization provides an educational forum which promotes the collaboration of Information Services and Technology, Facilities Management, Engineering, and Real Estate organizations in the New York Metro area in achieving and improving operational efficiency and advancing state-of-the-art reliability in infrastructure support.

## Scholarship Info

The Metro New York Chapter of the 7x24 Exchange has established a Scholarship Fund to promote and support the ongoing educational needs of the mission critical industry. Most recently the industry has experienced unprecedented growth, which has led to a critical shortage of educated, qualified individuals emerging from our educational system entering into Architectural, Engineering, Construction, IT, and or Facilities Management related firms. The proceeds from the Golf Outing will be used to support Scholarships for High School and College Students pursuing a career in a field of study related to our industry.

We are working in conjunction with several local Colleges and Universities, as well as, industry related mentoring programs, to promote these scholarships. Please ask any of the Board Members for information regarding this program. Thank you for your support of this very important effort in helping to promote our industry development, present opportunity for eligible candidates, and to develop and retain qualified, dedicated professionals serving the needs of the mission critical industry.
